

Montage

The Print Listings Workflow Solution

- Do you produce publications with high-volume advertisements?
- Are you looking to automate your listings workflow?
- Would you like greater consistency in managing your information?

What is Montage?

Montage is a print publication engine that is designed to simplify the collection, verification and layout of customer advertisements. Registered users can select one of a number of listing layouts, manage copy and personal details, and submit listings for publication. Administrators can review and approve these listings and generate individual print-ready PDFs, ready for layout in software such as Adobe InDesign.

The software is implemented as a secure .NET web application.

Features

- Optimised for production of large-scale trade-show catalogues and similar publications.
- Covers entire listing generation workflow – supports multiple submit, review and approval cycles between users and staff, multiple warning and publication deadlines.
- Workflow tools support bulk operations such as mass-mailing announcements to registered users, import user details from spreadsheets, batch generation of print-ready listings in PDF format.
- Multiple listing layout templates per publication.

Hassle-Free Workflow

Montage allows the process of listings confirmation to be mediated through a centralised online application, rather than emails and phone calls. Customers can be sent reminders for submissions close to the due date for publications. Template reminder messages can be specified per publication. Montage enforces cut off dates for publications to prevent third-party changes after documents have gone to print.

Montage supports import of data from existing spreadsheets to reduce the burden of data entry when migrating legacy data, or integrating with existing systems.

Local Team, Locally Supported

Montage is developed by an Australian firm with IT and software development support staff ready to answer your queries. We are happy to customise our products to ensure they are a complete fit with your organisation.

Pricing

Montage is priced according to a fixed installation and small per-listing maintenance fee. Contact us for a detailed assessment of your needs and a quote.

Contact Information
